

## Scheduling a text message for Android phones

**Step 1:** In your Messages app, start a new text message and the contact phone number just as you would a normal text message.

**Step 2:** Click on the 3 short lines at the top right of your message screen. This will open a menu as seen below.

**Step 3:** Click on “Schedule message”

**Step 4:** Using the calendar and time, choose when you would like to send your message and click "DONE."

**Step 5:** Type your message. Notice that the scheduled date and time appear above the text box.

**Step 6:** Click send! You're done 😊
